1 Introduction

This report has been prepared in accordance with the conditions of approval for the 'Cotter Dam Expansion – Paddy's River Road, ACT – EPBC 2008'. Specifically, ACTEW Water is to provide an annual report, detailing how environmental flows downstream of Cotter Dam have been released in accordance with the advice of the Environmental Flows Technical Advisory Group (EFTAG) established by the ACT Environment Protection Authority. The reporting period is the calendar year 2014.

2 EFTAG Recommendations

The Environmental Flows Technical Advisory Group (EFTAG) met on the 16th December 2014. There were representatives from ACT Government; the ACT Environment Protection Authority; and ACTEW Water.

There were no agenda items relevant to environmental flows downstream of Cotter Dam. ACTEW Water continues to provide environmental flows in accordance with the ACTEW Water's Licence To Take Water issued by the ACT Government; and in accordance with the Enlarged Cotter Dam Long Term Environmental Flow plan submitted to the Commonwealth Department of the Environment.

Reports outlining the volume and timing of environmental flows released from Cotter Dam are available on ACTEW's public website.
