

1

You drank 6-8 glasses of water today.

Like Hydration Girl says "Feel great and hydrate!"

Action: Swap spaces with one Player of your choice.

2

On a hot summers day temperatures are in the high 30 degrees. Your team is playing sport!

You ensure that all team members bring filled water bottles and make sure you have extra water for your team.

Action: Everyone moves one space each.

3

Your head is fuzzy and you are getting a dull headache.

You have not had any water today. This is a sign that you are dehydrated.

Action: Swap spaces with the Player directly behind you.

4

In Australia we have permanent water saving measures in place because of the dry conditions.

Every player needs to think about one thing they can do around the home or at school to be water wise.

Action: The three Players that had the top three ideas can move forward one space.

5

You notice that your wee colour is a dark yellow. This means that you're dehydrated.

You need to stop and drink at least 2-3 glasses a water.

Action: Swap spaces with the third Player behind you.

6

You have a big day planned full of adventure and play.

You have brought your full drink bottle to sip throughout the day to stay hydrated.

Action: Move ahead one space.

7

You carry your reusable water bottle with you into the city.

Action: Move forward three spaces.

8

What sort of drink bottle should you consider:

- a) A single use plastic drink bottle, or
- b) A reusable drink bottle made from hard PPE plastic or stainless steel?

Action: If you got the answer correct, move forward one space. If you were incorrect, move back one space.

9

You remind your family that only the 3 p's can be flushed down a toilet.

What are the three P's?

Action: If you are correct, swap spaces with the Player directly in front of you. If you are incorrect swap with the Player directly behind you.

10

Medicines are tipped down your laundry sink at home.

Medicines and other toxic chemicals tipped into a drain or sewerage can be bad for the water treatment process.

Action: Swap with the Player in last space on the board.

11

A member of your family uses wet wipes and flushes them down your toilet.

A blockage occurs in the sewage pipes.

Action: You and the Players either side of you must swap with the Players in the last three spaces on the board.

12

Paint is poured down the sink after painting some furniture. Paint is toxic to the water treatment process.

What should you do with the paint instead?

Action: If you are correct, move two spaces back. If your answer was incorrect stay where you are.

13

Cooking oil from a fry pan is poured into a waste carton to solidify before putting this into bin for disposal.

You know that oils are never to put down sinks or drains.

Action: Well done! Move forward one space.

14

Oil from a pan was put straight down the sink. This causes blockages in the sewage between your home and your neighbours.

Action: You and the Player closest to you on the board, swap spaces with the Players in the last two spaces on the board.

15

Hair is clogged in your shower drain. As a Drain Sheriff Champion you successfully remove the hair, disposing it in the bin or in compost.

You know that hair does not break down in water and can lead to sewer blockage.

Action: Move forward one space.

16

True or False?

You can go fishing on Googong Dam with a petrol powered boat.

Action: Move forward one space if correct. If incorrect, stay where you are.

17

Where can you go fishing at Googong Dam?

- A: From the bank of Googong Foreshores,
- B: From a human or electric powered boat or canoe,
- C: From the boat ramp, or
- D: all of the above.

Action: Move forward one space if correct. If incorrect, stay where you are.

18

Your group is out kayaking at Googong Dam. You recently had your kayak out on Lake Burley Griffin. What should you should do to help protect drinking water contamination in Googong Dam?

- A: Wash your Kayak before launching on the reservoir,
- B: Ensure that you launch from the bank,
- C: Observe maritime safety regulations including wearing a lifejacket,
- D: All of the above, or
- D: Answers A and B only.

Action: Move forward one space if correct. If incorrect, stay where you are.

19

You're mountain biking with your family. You stick to the formed roads around the foreshores. This is beneficial to ensure dirt and soil does not erode and wash or blow into the drinking water dam.

Action: Move forward one space if correct. If incorrect, stay where you are.

20

You're out fishing with friends in their new boat with an electric motor. They enter the water using the boat ramp. As they turn the corner, they take the hood off their petrol motor to quickly get to a known fishing location.

Action: Swap with the Player 2 spaces behind you.

21

You are out hiking or fishing on the Googong foreshores and you realise that you need to do a poo!

Should you:

- A: Find a nearby tree and do your business,
- B: make sure you're at least 150 m away from water edge, or
- C: Use the toilet facilities at picnic areas supplied.

Action: Move forward one space if correct. If incorrect, stay where you are.

22

You are at Googong Dam having a picnic lunch. You notice that rubbish has been left at the picnic tables by the people before you. You do the right thing and take it back with your own rubbish.

Action: Swap spaces with the leading Player on the board. Or move ahead two spaces.

23

You're out at the Dam with your friends in their car. You notice that one of them opens the vehicle door and places their takeaway packaging on the ground. They close the door and the car drives off.

Action: You miss your next turn for littering. Rubbish can end up in the drinking water reservoir.

24

You're with a group of friends, mountain biking off track at Googong Dam. You should stay on the track!

Action: Move back two spaces.

25

It's hot and you're visiting the Googong Foreshores with your relatives who are from interstate. Signs state that swimming is prohibited at Googong Dam. They ignore the signs and decide to go for a quick dip.

Action: Move back two spaces.

26

Knowing that swimming is not allowed at the reservoir. Your group of friends decide to go swimming downstream in the Queanbeyan river. Great choice!

Action: Move forward one space.

27

There is a total fire ban (TOBAN) in Queanbeyan today. Parks ACT close the foreshores for public safety. A local resident goes to Googong Reservoir with their dog and find the main gate closed. They decide to jump the fence and take their pooch for a walk.

Action: Go back two spaces.

28

You have brought the family dog with you to Googong Foreshores. You should leave your dog at home.

Action: Swap spaces with the last Player on the board.

29

You are keen to try out your new wind surf and head out to Googong Dam to give it a go.

Action: Move backwards two spaces.

30

Your group is mountain biking on formed roads around the foreshores. The lead starts to ride off track. You remind the group that Googong Dam is the region's drinking water dam and you stay on road.

Action: Move ahead two spaces.

40

What is drought?

Action: Move forward one space if correct.
If incorrect, stay where you are.

41

Permanent water saving measures mean that you can:

- A: Water your garden with a hose or use sprinklers from the 1st Sept to 31st May between before 9am and after 6pm
- B: Wash your car on the lawn area using a bucket or at a car wash, or
- C: All of the above

Action: Move forward one space if correct. If incorrect, stay where you are.

42

Name the four Dams of the ACT Water network.

Action: Move forward one space if correct.
If incorrect, stay where you are.

43

You're out in the city and feeling thirsty and you do not have your drink bottle.

Do you:

- A: Buy a plastic single use bottle, or
- B: Drink water from a water refill station.

Action: Move forward one space if correct.
If incorrect, stay where you are..

44

True or false?

Tap water is cheaper than bottled water.

Action: Move forward one space if correct. If incorrect, stay where you are.

CHANCE CARD

GROUP CHALLENGE: Water conservation is the practice of using water efficiently to reduce unnecessary water usage. How many practical ways you can be water wise around your home. For one minute brainstorm and write down your ideas.

Action: Share your ideas. Every player that has the most ideas will move forward two spaces.

CHANCE CARD

GROUP CHALLENGE: Keeping our source drinking water safe is something we all have a responsibility. This includes how we use our drinking water supply in our everyday living activities. To positive actions when out visiting and recreating in the Cotter River catchment or at the Googong Dam and Foreshores. Brainstorm together all the positive actions you can think that we can do as a community to help safeguard our drinking water supply.

Action: Every player that has the identified a great idea will move forward two spaces.

CHANCE CARD

Hydration Girl's message to the National Capital is "Feel Great and Hydrate".

Drinking water is important for a healthy heart and body. Name two more reasons why water is essential for life. For two minutes brainstorm your ideas.

Action: If you can answer successfully, each Player in the team can move forward one space.

CHANCE CARD

GROUP CHALLENGE: Fatburgs are network blockages that occur when the wrong things are flushed down the toilet. What are the wrong things that are flushed?

Discuss ideas in your teams for two minutes and write down your ideas.

Action: Each Player in the team with the best answers can move forward one space.

CHANCE CARD

GROUP CHALLENGE: Where does wastewater flow to once we pull the bathplug, have a shower, wash hands, use the dishwasher and washing machine. Not to forget flushing the toilet. As a group discuss the journey from our taps to the drains through the sewer pipes to the treatment plant process and onto the Murrumbidgee River. As a group act out the journey of waste water in the ACT.

Action: Well done to each player that has acted out or discussed the journey of our sewage network. All those who creatively acted this out take a bow and move one square forward.

CHANCE CARD

GROUP CHALLENGE: Blockage Busters are Icon Water's fabulous field staff. When something other than the three P's is flushed down the loo our Blockage Busters are the ones that go in and fix it. What are the wrong things that our Blockage Buster's might find the sewer network near your place? Brainstorm and write down your ideas. Share your ideas with each other.

Action: Well done to each player that has identified a non-flushable item. Non flushable items are bad news for our sewage systems. All players to move back two squares.
